

24/7 Product Information for Smooth Lifecycle Management

Enics Product Lifecycle Management Services are ready for you on Enics Life — Enics' unique web portal

Enics Life transforms the way you manage your product portfolio—with Enics. The web portal gives you 24-hour convenient, transparent and easy access to all relevant information about your products and their status—as YOU need it. Enics Life is not a “closed”, but a thriving platform with new additions coming soon.

We created Life so you can focus on yours!

Enics Product Lifecycle Management Services (PLM)

Product Lifecycle Management (PLM) is the answer to your challenges like:

- What obligations do you have towards your customers? How do you secure them?
- Do you have products that are coming to an end of their lifecycle? How do you manage that?
- How do you manage prototypes? How do you select new components?
- Is RoHS or conflict minerals a critical topic for you?

With Enics Product Lifecycle Management Services on Enics Life you have the lifecycle of your products and components fully under control and access to the whole Enics component library is just a few clicks away.

Enics Product Lifecycle Management Services (PLM) on Enics Life include the following features:

GENERAL INFORMATION

- News and events from the Enics world
- Overview of your Enics contacts
- Information about Enics' preferred manufacturers
- Important documents and templates such as a component technology roadmap and design guidelines

REQUEST MANAGER

- Statement of all your component cancellations and modifications including all supplemental information
- Answers to «Requests» can be entered directly via Enics Life
- Clearly arranged schedule monitoring
- Apply for the addition or modification of a component or even a product with just a few mouse clicks

SEARCH & VIEW

- Access to all your product parts' lists and component data just as they are managed in the Enics-wide product data management system, including the associated documentation
- A component search using various different attributes
- Access to the Enics Library containing more than 400,000 components or to the Extended Library with several 100 million components

BOM EVALUATION

- Various options for reporting your product parts lists such as
 - RoHS status
 - REACH
 - Conflict minerals
 - Lifecycle status
 - Alternative search
- Includes detailed information of the individual components

BOM IMPORT/EXPORT

- Import a parts list into Enics Life and evaluate it immediately e.g. to review Life Cycle status
- Export a parts list to Excel with just a mouse click

EASY NAVIGATION AND HIGH SECURITY

What use is information if you can't find it? Useless! That's why the Enics Life web portal emphasizes visual attractiveness simultaneously with simple and clear user guidance, supported by visual and graphical «pathfinders». Access to the web portal is through an encrypted and password-protected connection, so you can be assured that no unauthorized party has access to your data.

ENICS GROUP: GLOBAL EMS PARTNER

Enics is the partner of choice for industrial electronics companies with our world class Electronics Manufacturing Services spanning the product's entire lifecycle – from development support to new product introduction to manufacturing to life extension services.

As one of the largest Electronics Manufacturing Service providers in the world, we help our customers to optimize their value chains and improve their competitiveness.
